

PACIFIC PRIDE
COMMUNITIES

"We contracted with Lanlogic to supply professional assistance in setting up our operating system in 2003 with three employees, and now serve our growing company of over 30 employees. The staff has always been very responsive and a pleasure to work with. We intend to retain their services for a long time and enjoy a great relationship!!!"

Bernie Heyne
VP, Pacific Pride Communities

Leveraging Comprehensive IT Services A Startup IT Case Study

Pacific Pride Communities needed a new network designed and implemented to accommodate its rapid growth. They turned to Lanlogic to recommend and deploy a solution that keeps on-site administration to a minimum and complements it with a scalable implementation of Hosted Exchange for email.

PACIFIC PRIDE COMMUNITIES PROVIDES RESIDENTIAL HOMES FOR NEW BUYERS

Located in the California Central Valley, Pacific Pride Communities is a builder of single-family homes. They have a staff of over 30 employees, many of whom are mobile employees.

RAPID GROWTH CREATES DEMANDS FOR IT INFRASTRUCTURE AND SUPPORT

Pacific Pride Communities grew from three employees to 33 in a short amount of time. Such a rapid increase made them realize that they needed a new network design and implementation, as well as recommendations for server and workstation configurations to support a mobile workforce.

The technology objectives they set out to achieve included:

- Leverage server-based technologies with little or no in-house expertise
- Implement a fully-featured email solution with minimal administrative overhead
- Install scalable solutions which would align with rapid distributed growth
- Provide mobile access to email for executives and sales staff
- Gain assistance with planning and execution of relocation of IT infrastructure
- Improve management of internet domain namespaces
- Obtain technical advice when dealing with website developers

LANLOGIC PROVIDES PACIFIC PRIDE COMMUNITIES A FULL RANGE OF HOSTING SERVICES

To keep Pacific Pride Communities focused on its business instead of its technology, Lanlogic designed and implemented a network plan that included hosting services at its data center.

PACIFIC PRIDE COMMUNITIES ACHIEVES PRODUCTIVITY ENHANCEMENTS AND STAYS FOCUSED ON ITS CORE COMPETENCIES

Utilizing Lanlogic's Hosted Exchange services, Pacific Pride Communities realizes many internal benefits, such as:

- Shared contacts and calendars
- Web-based access to the functions of Outlook
- Enterprise-level technology without the overhead needed to manage it

But company executives were looking for more ways to boost company productivity: a way to remain mobile *and* stay connected. Lanlogic enhanced the Hosted Exchange with Hosted Blackberry services that provided this data mobility without the expensive infrastructure normally required.
